

Forensic Photographer

Highlights:

- You'll be joining a dynamic forensics team with many opportunities to grow professionally and working with other forensic experts in various fields to support the FBI and TEDAC missions.
- This is a unique opportunity to work with the FBI laboratory.
- You'll obtain some or enhance your experience working in a fully functional government laboratory working closely with other forensics experts.

Tasks:

- Perform both object photography and latent print photography. Latent print photography requires capture of high-resolution images of latent prints on a wide range of complex forensic material associated with IEDs.
- Recognize developed latent prints and preserve them in a manner to ensure that the images are correctly captured and retrievable.
- Must complete an internal training program for working with evidence.
- Process images using advanced imaging software, prepare detailed notes of work, and preserve images on non-rewritable media.
- Support activities, functions, or duties, as defined in future TOs Perform and document safety-check practices on all evidence submitted for explosives testing.
- Research, develop, and author whitepapers and information papers, as required

Requirements:

- Education: Associate degree in photography with at least two (2) years of photographic experience or a Bachelor of Arts (B.A.)/B.S. degree in photography.
- Experience: minimum of one (1) year of experience in photographic documentation of evidence.
- Skills: In depth knowledge of Photoshop and photography, experience working with macro lenses, organizational skills and multi-tasking in a fast-paced environment. Job requires the ability to photograph a variety of subject matters from crime scene to event imaging. Good communication skills and the ability to work well with others required. This is a detail-oriented position, which requires the need to stay focused and, at times, prioritize many jobs
