

# Sr. Forensic Drug Chemist

Forensic Pearl, Mississippi

## Description

SNA International seeks a bright, collaborative Sr. Forensic Drug Chemist with a strong work ethic to join our team. SNA International's team works together in pursuit of the same cause, to build a safe and just world by empowering organizations in the use of forensics, biometrics, and identity intelligence.

Qualified candidates will provide forensic science services that includes the initial in-processing of forensic submissions, evidence control and management, controlled substances examinations, and examination of firearms evidence.

### **Responsibilities include but are not limited to:**

- Develop and maintain a Project Management Plan (PMP) that outlines objectives, timelines, resource allocation, and budget estimates.
- Conduct weekly status meetings with all stakeholders to review the progress and discuss any challenges or blockers and possible mitigation strategies.
- Prepare monthly performance reports, including milestones achieved, challenges faced, and financial statements.
- Oversee contractor personnel and ensure their performance aligns with the project goals and objectives.

### **Minimum Education and Experience Requirements:**

- Bachelor's degree from an accredited four-year college/university in chemistry or other related science with sufficient chemistry courses (minimally general, organic, and analytical) or equivalent experience.
- Five (5) years of experience working as a Forensic Drug Chemist within an ISO/IEC 17025 forensic crime laboratory.
- Experience supervising staff within a forensic laboratory (i.e., Team Lead, etc.).
- Experienced working in and complying with ISO/IEC 17025 accreditation standards.
- Experience utilizing instruments and methodologies to analyze controlled substances (e.g., Color Tests, GC, GC/MS, FTIR) and performing microscope and chemical tests.
- Experience with laboratory safety procedures, quality assurance/quality control and laboratory practices, instrumental analysis, and experience in forensic drug analysis.
- Experience or applicable training testifying in court.
- Flexibility to travel to other laboratories within the state if required.
