

ATTENTION:

The Charles County Sheriff's Office
Is now accepting applications for the position of:
Forensic Chemist I
Criminal Investigations Division
Grade 113/ \$56,838.23

SUMMARY:

This **non-critical** entry-level position is located at the **Maryland State Police Forensic Sciences Division in Pikesville, Maryland**. Employees in this classification perform laboratory tests to analyze Controlled Dangerous Substances (CDS) and testify to the results as an expert in court. Employees do not supervise other positions, but receive supervision from a Maryland State Police Forensic Scientist Supervisor. Until the individual completes all training and certification, they will be a trainee and under close supervision. The employee reports directly to, **the Maryland State Police Forensic Science Division Supervisor** and the **Deputy Director of the Forensic Science Section, Charles County Sheriff's Office**.

ELIGIBILITY REQUIREMENTS

- A Bachelor's degree in chemistry, biology, biochemistry, genetics, medical technology, pharmaceutical science, or related physical, natural or forensic science from an accredited college or university; including one course in analytical chemistry and one course in organic chemistry.
- Must be able to successfully complete a basic training program for certified chemist or certified chemical analyst provided by a forensic laboratory licensed by the Maryland Department of Health
- Candidates will be subject to an initial drug screening, a physical examination, submission of a DNA sample, and a complete criminal background investigation, to include a polygraph examination, before a permanent appointment can be made. A criminal conviction may be grounds for rejection of the candidate.

ESSENTIAL DUTIES

Please refer to the attached job description for the list of essential duties.
