

## Uncover Forensics **FORENSIC TRAINING**

# **JUST SWAB IT!** **BIOLOGICAL EVIDENCE RECOVERY** *8-hour online, self-paced course*

*IAI approved for 8 hours of Crime Scene recertification training*

The collection of biological evidence can sometimes be more complicated than it appears. The “just swab it” mindset is not as clear and concise as one might think. This interactive course explores the types of evidence we swab, swabbing materials, the different methodologies used in swabbing, swabbing at crime scenes, swabbing evidence, working with your forensic laboratory, understanding DNA analysis results & answering questions in court.

## Course Curriculum

Each lecture is prerecorded, granting students the flexibility to play, pause, and rewind at their discretion, ensuring optimal comprehension. Furthermore, all assignments and tests are seamlessly conducted online via our integrated course platform. With the freedom to progress at their preferred pace and convenience, students enjoy an unparalleled educational experience tailored to their unique learning styles and schedules.

### Module 1

Introduction

Types of DNA Analysis in Forensics

Body Fluids & DNA

Case Study

Module 1 Quiz

Module 1 Assignment

### Module 2

Different Materials of a Swab & Options

Various Swabbing Methods

How to Package Swabs

ISO 18385:2016 document & swab-related standards

Case Study

Module 2 Quiz

Module 2 Assignment

### Module 3

Strategies for Swabbing Different Types of Items

Touch DNA Considerations

Swabbing People

Considerations for Other Forensic Evidence & Order of Operations

Deciding What to Swab at Scenes

When Not to swab

Module 3 Quiz

Module 3 Assignment

### Module 4

Sending Swabs to a Lab

CODIS (What is it & How Does it Work?)

How to Read DNA Analysis Reports

Report Writing for Swab Collection

Testimony on Swab Collection

Module 4 Quiz

Module 4 Assignment

### Conclusion

Closing Remarks

*IAI approved for 8 hours of Crime Scene recertification training*
