

Uncover Forensics FORENSIC TRAINING

“H.I.T.C.H.S.” – A SIMPLIFIED APPROACH TO PLANTAR FRICTION RIDGE SKIN COMPARISONS

8-hour online, self-paced course - IAI approved!

This course is designed to give examiners a useful skill set in what has otherwise been an underrepresented area of friction ridge examination - plantar impressions. Principal topics include regions/topography of plantar skin, helpful hints in recognition of plantar friction ridge skin, techniques for easier searching and comparisons, as well as how to obtain plantar major case prints. Additionally included is a brief history of friction ridge examination and early researchers, and the biology and morphology of friction ridge skin. Students will get a chance to participate in multiple side-by-side comparisons of plantar impressions in order to practice their new skills and gain experience with them.

Online, ON-DEMAND training
Train where you want, when you want
