JOB DESCRIPTION:

The Department of Public Safety is recruiting for a Forensic Scientist II/III Flex to join our team committed to public safety through public service.

This position is part of the Alaska State Crime Lab and the Forensic Scientist II is the intermediate level in the professional series where incumbents apply scientific methods to study evidence submitted and used in a court of law.

Forensic Scientist III is the full proficiency level in the professional series. Incumbents perform the full range and scope of forensic analysis to study evidence submitted and used in a court of law.

Key Responsibilities of this position include:

- Perform difficult professional laboratory analysis of physical evidence in one or more forensic disciplines.
- Prepare and conduct quality control testing on reagents and supplies.
- Provide expert opinion on major case reviews in specific forensic discipline.
- Provide technical consultation services in a forensic discipline to law enforcement officers, attorneys, and other agency representatives.
- Engage in peer review exercises.

We are looking to hire someone with the following knowledge, skills, abilities, and experience:

- Considerable knowledge of forensic analysis and standard laboratory testing and principles, practices and techniques.
- Considerable knowledge in a forensic discipline.

- Considerable knowledge of one or more of the following: chemistry, mathematics, statistical methods, physics, biology, or scientific measurements.
- Considerable knowledge of proper physical evidence collection and documentation techniques and methods.
- Considerable knowledge of the rules of evidence collection for use in criminal prosecution.

The Department of Public Safety strives to preserve the peace, enforce the law, prevent and detect crime, and protect life and property. All positions support or carry out the Department's mission. If our mission interests you and this position embodies your strengths, please consider joining our team.
