

# BIOMETRIC SUBJECT MATTER EXPERT

LOCATION: ARLINGTON, VA, US  
OPEN UNTIL FILLED

## Job Description

### Key Role:

Research, analyze, and maintain biometric examination technology or standard operating procedures, including both iris and face images. Act as a subject matter expert, interfacing and collaborating with government clients and internal team members. Provide consultative enhancement recommendations based on industry research and collaboration on government contacts. Conduct biometric examination services using government provided equipment or technology. Recommend enhancements to improve multi-modal data integrity, including newly created or improved existing processes, procedures, technical enhancements, resource requirements, and stakeholder engagement procedures for data correction, analytic projects, and report generation.

### Basic Qualifications:

- 3+ years of experience with the review, analysis, and comparison of biometric images in specific modalities, including iris or face
- Experience with commercially available image processing and comparison tools
- Experience with the review and evaluation of identity data contained in at least one large federal identity information repository
- Experience with IT standards
- Experience in a forensic investigations or support role
- DHS Suitability clearance required
- BA or BS degree

### Additional Qualifications:

- MA or MS degree preferred
- Professional Biometrics-related Certification preferred

### Clearance:

Applicants selected will be subject to a security investigation and may need to meet eligibility requirements for access to classified information; DHS Suitability clearance is required.
