"T.H.I.N.K."- Practical Techniques for Palm Print Comparisons

24 Hour *Self-Paced Course*

- with Instructor *Corey Schroeder, CLPE*

The purpose of this course is to provide beneficial skills and knowledge applicable to the performance of friction ridge examinations of the palmar surfaces of human beings. Principal topics covered by the course include a brief history of friction ridge examination, the structure and morphology of friction ridge skin and the human hand, the dermatoglyphics and the topography of palmar friction ridge skin (including palmar regions, pattern areas and creases), how to conduct side-by-side comparisons, and helpful tips for easier recognition of palmar friction ridge skin for efficient searching and comparisons.

This course qualifies for 24 hours of IAI certification and recertification training credit for both the latent print and tenprint disciplines.

Required materials for this course include: white contact paper (handprint), acetate sheets or clear plastic, black fingerprint powder and brush, colored pens or pencils.

**IAI approved
for latent and
tenprint
certification &
recertification
credit**
